Location: London, UK

## Aims & Objectives

---

A qualified and highly experienced developer currently based in London, UK, with over **6 year experience** particularly in the personal identification, security, tourism industry and ERPs. During this period I have also gained valuable experience in leading development teams and team working. I have both technical and interpersonal skills and I am looking for a challenging role that utilises my previous skills and experiences. I never stop improving my skills and keeping up to date. Mainly focused on backend development, but always eager to be helpful in frontend and devops.

## Skills

---

<b>Go</b> The language I master the most and my main improving focus. I attend Go meetups every week.	<b>Docker, Concourse, Kubernetes</b> Always willing to complete the entire cycle of the application. I use Docker containers and deploy applications to Kubernetes using Concourse pipelines on a daily basis.	<b>Java, Node, React, Blockchain</b> Java developer for 5 years. Currently using Node, React and Go as part of the architecture in the project I work. Also interested in Blockchain (side projects and King's College lectures).	<b>PostgreSQL, Mongo</b> I have worked with multiple databases. These are the ones I have worked with the most.
