## SKILLS

Mainly focused on backend development, but always eager to have control also in the frontend.

Go, Java, Node, React

PostgreSQL, Mongo

Docker, Concourse, Kubernetes

---

## AIM & AMBITIONS

Work in a company where I feel it is growing up thanks to my effort.

Work mainly in backend being conscious of the entire cycle of the project, I would like to be close to frontend and devops issues.

---

---

## EXPERIENCE AND PROJECTS

---

A qualified and highly experienced developer currently based in London, UK, with over **6 year experience** particularly in the personal identification, security, tourism industry and ERPs. During this period I have also gained valuable experience in leading development teams and team working. I have both technical and interpersonal skills and I am looking for a challenging role that utilises my previous skills and experiences. In the future, I do not want to stop improving my skills or learning new technology, and work in a project where I have some kind of responsibility.

October 2017 - Currently

A digital identity system that provides a simple and secure way of proving identities, online and face to face. I worked in the admin and backoffice team as a backend developer. The stack was mainly Go, Node and React.

March 2016 - October 2017

A ERP for pest and environmental health management companies. I was full-stack developer and also coordinated among frontend, backend and customer service teams. The stack was mainly Java and Angular.

...

I have also worked in projects for the following companies:
